JL: Because I may not reply to Jimmy's letter immediately, I send it and will send the reply when I make it. I think you should have Jerry's now.

DeVosjoli: not author, collaborator. Remind me to show you a Romero cable about me. Then ask yourself how nayone knew, particularly a French anyone. I did break up a U.S. deal on it.

I do believe Farewell America was a French (SDECE) job and believe CIA interest in it is likely. Because of deV's SDECE oast his connection seems probable.

I'm glad you see the probability of unt/deV common past on your own. It has seemed obvious to me since I first read of "Eduardo." By the way, deV's Bay Pigs claims are fiction. He did not notify the U.S. Government. Perhaps it would be more accurate to put it h e was not the source of what it regarded as proof. I have Lhamia if you do not and want to read it. Best, HW 2/5/74
